

## **SAFETY AND RELIABILITY – TWEHA SYSTEMS PASS THE TESTS!**

We are a leading manufacturer of high-quality adhesive systems used worldwide in the facade industry. With a range of application-specific solutions and a focus on innovation, we serve customers with products that meet their unique requirements.

We are committed to ensuring that our adhesive systems meet the highest standards and deliver superior performance on various substrates. To achieve this, we have intensified our R&D efforts and invested in advanced testing facilities.

Our specialized technical teams conduct continuous comprehensive tests on a wide range of types, materials, and brands of facade cladding.

By testing our product range under different conditions, we can guarantee that our adhesive systems provide optimal adhesion, durability, and performance, regardless of the specific material or application.

And, of course, we value the feedback from our customers. During the testing processes, we have closely collaborated with industries and customers to ensure that we meet their unique requirements and challenges. This collaboration has helped us and panel manufacturers increase our understanding of various applications and further improve our products.

Look at the overview of tested and approved materials, and feel free to request more information. We would be happy to provide you with comprehensive test reports on the test results!
