

TWEHA ACTIVE IN 46 COUNTRIES WORLDWIDE: THINK GLOBAL, ACT LOCAL!

Because we cannot serve the entire world from the Netherlands on our own - and because we believe it is important that our customers can do business in their own language and within their own culture - TWEHA works with an extensive network of local distributors. With these experts, who are selected with care, we are already represented in 46 countries.

Europe is our home-market, but we are also active in Canada, the US, South Korea, and the Middle East. All our partners follow an intensive training program so that they can add value to our products and customers.

To expand our global availability, we are constantly looking for new resellers, distributors, and representatives. Experience in the adhesive- or cladding industry is an advantage, but certainly not a must. After all, it's never too late to learn!

Expert after-sales service and support wherever you are.

Ever since we sold our first adhesive system for facade cladding in the 1980s, our philosophy has been not only to supply leading, high-quality products, but above all to support our customers with excellent after-sales service and support. Meanwhile, TWEHA has grown into an organization with global representation in over 45 countries.

This network consists of branches, training centers, distribution centers and distributors with expertly trained personnel providing full service and support.

Our distributors have the necessary skills and knowledge. With great care, these experts are selected, and knowledge is imparted to them. They are masters of their trade. And thus, they offer added value to the TWEHA organization.

And of course, by transferring knowledge to our certified 'Partners in Bonding', we create significant added value for their local clients. Also, after completion of the project!

These "Partners in Bonding" are ready to give you expert technical advice every step of the way. They help you make the best choice in specific applications and provide top-notch training on all our products.
