

REFORMING FACADE ELEMENT MANUFACTURING

Modular construction has evolved into a significant force in the global construction industry, changing the way buildings are designed, manufactured, and assembled. More and more 'prefab builders' are discovering the quality of TWEHA, resulting in worldwide use on the most prestigious projects.

The rise of adhesives and sealants represents a transformative shift in industrial practices. By offering superior performance characteristics, adhesive systems are reshaping solutions for the facade and construction sectors.

TWEHA continues to push the boundaries of adhesive technology, and our commitment goes beyond products. We forge strong international partnerships through exceptional support and unparalleled customer service.

Our extensive international distribution network ensures supply chain efficiency to meet our customers' demands.
